PROFILE

I am currently a third-year student studying Applied Computer Science at Dalhousie University, while completing learning opportunities through the Faculty of Management to strengthen my understanding of business, data, and organizational problem-solving. Through my experiences as both an entrepreneur and an employee, I have developed a strong foundation in technology and business, applying that knowledge to support business growth, improve processes, and enhance customer experiences. I actively embrace AI-assisted development, leveraging modern tools to build faster and smarter. My goal is to contribute to meaningful solutions that address real-world challenges through practical, well-designed technology.

WORK EXPERIENCE

Royal Bank of Canada. – *Analyst – Financial Shared Services* **May 2025 - August 2025**

- Managed operational tasks and oversaw the invoice lifecycle for RBC's U.S. business units.
- Used SAP to cross-reference vendor information, validate purchase orders, and monitor payments.
- Leveraged Pega to route and track invoices through automated workflows, ensuring accuracy.
- Utilized Microsoft Excel to index and stamp verified invoices and organizational documentation.

Torinit Technologies Inc. – *Digital Solutions Intern* **May 2024 - August 2024**

- Utilized tools such as ZoomInfo, HubSpot, and LinkedIn Sales Navigator to drive client growth.
- Created digital content for LinkedIn using Canva, developing social media schedules and strategies.
- Applied design thinking strategies to create proof of concept (POC) for digital solutions.
- Streamlined team collaboration through Microsoft Teams and Excel for data-driven decision-making.

Mirabella Development Corporation – *Research & Development Intern* **June 2023 - August 2023**

- Conducted market research on industry trends, consumer preferences, and competitive positioning.
- Organized and facilitated meetings, driving cross-functional discussions and actionable outcomes.
- Networked with industry professionals to gain insights into real estate development and investments.
- Managed project tasks, resource allocation, and progress tracking across concurrent initiatives.

Panther – *Founder & Head of Operations* **September 2021 - August 2023**

- Generated \$40,000+ in revenue through innovative sales strategies and business process optimization.
- Directed a sales team, managing strategic execution and personnel training to meet revenue targets.
- Led social media marketing campaigns to boost visibility and engagement for student events.
- Coordinated event logistics, venue bookings, contract negotiations, and budget adherence.

Scale Hospitality – *Hospitality Assistant* **June 2022 - August 2022**

- Collaborated with waitstaff, bartenders, and kitchen staff to deliver seamless fine-dining experiences.
- Maintained high standards of cleanliness, table presentation, and venue aesthetics.
- Delivered top-tier customer service in an upscale, high-profile hospitality environment.
- Supported smooth restaurant operations during high-volume periods, adapting to fast-paced demands.

Over the Rainbow Ltd. – Sales Associate

June 2021 - August 2021

- Managed and restocked inventory across the sales floor, ensuring optimal product availability.
- Assisted clients with product information, styling advice, and personalized recommendations.
- Fulfilled online and in-store orders promptly, coordinating shipping and pickup logistics.
- Provided excellent customer service in an upscale retail environment, servicing high-profile clients.

S&L Sports Camp – Co-Founder & Lead Director

May 2020 - September 2020

- Generated \$15,000+ in revenue by co-founding and directing a youth sports camp.
- Designed, produced, deployed, and maintained the company website.
- Managed cash handling, online transactions, and financial record-keeping across multiple streams.
- Created a positive, engaging environment for children to learn and play.

EDUCATION

Dalhousie University, Halifax, NS – Applied Computer Science

September 2023 – Candidate 2027

- Dean's List Student (3.91 Cumulative GPA)
- Working towards my Bachelor of Applied Computer Science
- Working towards my Certificate in Managing Data and Information

PROJECTS

Pride STEM Canada – Senior Developer

January 2026 – April 2026

- Built a full-stack website using Next.js, React, Firebase, and Stripe for a national STEM nonprofit.
- Led core architectural decisions and owned implementation of the site's most complex features.
- Integrated Stripe for multi-tier conference registration with secure payment processing.
- Configured Firebase for authentication and real-time data and Resend for transactional emails.

Tic Tec Toe – Junior Developer

January 2025 – April 2025

- Developed a cross-platform mobile app for researchers using React Native, Expo Go, and Node.js.
- Built a personalized feed for discovering papers and interacting with peers via likes and comments.
- Designed the interface iteratively in Figma and coordinated project tasks and sprints through Jira.
- Configured Supabase for backend database management, user authentication, and real-time storage.
